PROFESSIONAL SUMMARY

Java Full Stack Developer with a Bachelor of Technology in Computer Science and Engineering (Artificial Intelligence and Machine Learning) from Vellore Institute of Technology, Andhra Pradesh (VIT-AP) and corporate software engineering experience at Abhishyandh Global Solutions. Proficient in multi-tier architecture combining **Java (JDK 17)**, **Spring Boot 3**, **Spring Data JPA**, and **MySQL** on the backend with **React.js (v18)**, modern **JavaScript**, **HTML5**, and **CSS3** on the frontend. Demonstrated expertise in developing RESTful APIs, implementing JSON Web Token (JWT) security with Role-Based Access Control (RBAC), architecting relational database schemas, and building responsive client-side user interfaces.

TECHNICAL SKILLS

Backend Technologies:	Java (JDK 8 / 11 / 17), Spring Boot 3, Spring Data JPA, Hibernate ORM, Spring MVC, Servlets, JavaServer Pages (JSP), Java Database Connectivity (JDBC), RESTful APIs, Maven
Frontend Technologies:	React.js (v18), JavaScript (ECMAScript 6+), HTML5, CSS3, Vite, React Router DOM, Context API, Lucide React
Databases & Persistence:	MySQL 8.0, Relational Database Modeling, SQL, HikariCP Connection Pooling, Schema Optimization
Security & Architecture:	JSON Web Tokens (JWT), Role-Based Access Control (RBAC), HTTP Interceptors, Model-View-Controller (MVC), Data Access Object (DAO)
Integration & Communication:	JavaMailSender, MIME HTML Email Templates, Axios, REST Client Integration, Multipart File Uploads
Developer Tools:	Git, GitHub, Postman, Eclipse IDE, VS Code, Apache Tomcat, npm

PROFESSIONAL EXPERIENCE

Abhishyandh Global Solutions — Associate Developer — **August 2026 – Present | Andhra Pradesh, India**

Project: Hospital Care Web Portal (React.js 18, Vite, Modern CSS3)

- Developed a responsive healthcare portal presenting department listings, key operational statistics, doctor directories, and patient resources.
- Implemented accessible doctor profile modal dialogs with keyboard navigation (`Escape` dismissal), background scroll locking, and ARIA attributes.
- Created a controlled appointment booking interface with client-side form validation and local storage persistence.

Project: Minutes of Meeting (MoM) Management Platform (Spring Boot 3, Java 17, React.js 18, MySQL, JPA/Hibernate, REST APIs)

- Developed full-stack capabilities for an enterprise governance platform, connecting a React.js single-page frontend to a Spring Boot REST API.
- Implemented RESTful controllers and service layer business logic for meeting lifecycles, managing draft persistence, validations, and final submissions.
- Configured **Spring Data JPA** and **Hibernate ORM** mappings with MySQL, managing relational entities (`Mom`, `MomEntry`, `Employee`) with cascading persistence.
- Built a custom **JWT authentication interceptor** and `CurrentUserResolver` in Spring Boot to validate bearer tokens and enforce Role-Based Access Control (RBAC).
- Engineered a collaborative temporary edit session workflow allowing designated coordinators to request time-bounded access to locked records with approval gates.
- Integrated **JavaMailSender** with dynamic HTML templates to dispatch meeting notifications, featuring an environment toggle to safely simulate dispatch during testing.
- Constructed responsive React.js user interfaces utilizing Axios, Context API, and modular modal components for meeting configuration and record review.

PERSONAL PROJECTS

Food Delivery Web Application — Personal Project — **Java, Servlets, JSP, JDBC, MySQL, HTML5, CSS3, JavaScript, Apache Tomcat**

Repository: github.com/VinayKumar0745/FoodDelivery

- Engineered a full-stack food delivery web application utilizing the **Model-View-Controller (MVC)** and **Data Access Object (DAO)** architectural patterns.
- Built server-rendered dynamic web pages using **JSP**, **HTML5**, and modern **CSS3** featuring responsive restaurant cards, categorized menus, and checkout forms.
- Implemented controller servlets (`RestaurantServlet`, `MenuServlet`, `CartServlet`, `CheckOutServlet`, `LoginUserServlet`) to process client requests and route responses.
- Designed and executed relational database operations in **MySQL** via **JDBC** and `PreparedStatement` interfaces across users, restaurants, menu items, orders, and addresses.
- Managed session-based shopping cart workflows with Java `HttpSession`, enabling real-time cart item addition, quantity updates, and transactional checkout persistence.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering — **Graduation: 2025**

Vellore Institute of Technology, Andhra Pradesh (VIT-AP) • Specialization: Artificial Intelligence & Machine Learning
