PROFESSIONAL SUMMARY

Frontend Developer with a Bachelor of Technology in Computer Science and Engineering (Artificial Intelligence and Machine Learning) from Vellore Institute of Technology, Andhra Pradesh (VIT-AP) and corporate software development experience building accessible, responsive web applications at Abhishyandh Global Solutions. Specialized in **React.js (v18)**, modern **JavaScript (ECMAScript 6+)**, **HTML5**, **CSS3**, and RESTful Application Programming Interface (API) integration. Proven track record developing enterprise role-based dashboards, collaborative workflows, accessible modal architectures, and reusable component libraries. Dedicated to writing clean, maintainable frontend code with robust client-side validation and responsive user interface design.

TECHNICAL SKILLS

Core Languages:	JavaScript (ECMAScript 6+), HTML5, CSS3
Frameworks & Libraries:	React.js (v18), React Router DOM (v6), Vite, JSX
State & Data Fetching:	React Context API, Axios, REST APIs, JSON, Browser Storage (Local & Session Storage)
UI & Styling:	CSS3 Flexbox & Grid Systems, CSS Modules, Modern CSS Variables, Responsive Web Design, Lucide React
Form Handling & Validation:	Controlled Components, Client-side Form Validation, Error Handling
Developer Tools:	Git, GitHub, Vite, npm, Postman, Chrome DevTools, VS Code

PROFESSIONAL EXPERIENCE

Abhishyandh Global Solutions — Associate Developer — August 2026 – Present | Andhra Pradesh, India

Project: Hospital Care Web Portal (React.js 18, Vite, Modern CSS3, Local Storage)

- Developed a responsive healthcare portal presenting department listings, key operational statistics, doctor directories, and patient resources.
- Built accessible doctor profile modals featuring keyboard navigation (`Escape` dismissal), background scroll locking, backdrop click dismissal, and ARIA labels.
- Implemented a controlled appointment booking interface with client-side form validation, local storage persistence, and accessible feedback alerts.

Project: Minutes of Meeting (MoM) Management Platform (React.js 18, Vite, React Router 6, Axios, Context API)

- Architected a feature-sliced React frontend comprising dedicated modules for authentication, staff directory, and meeting governance.
- Implemented declarative **Role-Based Access Control (RBAC)** to dynamically restrict navigation routes and action controls across HR Admin, MoM Coordinator, IT Admin, and MIS personas.
- Engineered a collaborative document editing workflow featuring draft expiration countdown timers and dedicated modals for requesting, reviewing, and approving temporary edit sessions.
- Built reusable UI components including dynamic meeting entry forms, responsive record tables, employee selection drawers, and printable summary views.
- Integrated Axios HTTP client with centralized response interceptors for JWT bearer authentication, loading states, and contextual toast alerts.

PERSONAL PROJECTS

Food Delivery Web Application (Java, JSP & JDBC Architecture) — Personal Project — Java, JSP, Servlets, JDBC, MySQL, HTML5, CSS3, JavaScript

Repository: github.com/VinayKumar0745/FoodDelivery

- Developed a complete food ordering web application with dynamic server-rendered frontend views using **JSP**, **HTML5**, and modern **CSS3**.
- Engineered responsive user interfaces with CSS custom properties (variables), Flexbox, and Grid for restaurant cards, categorized menus, and checkout pages.
- Implemented client-side and server-side form validation for user registration, authentication, and delivery address inputs.
- Managed session-based shopping cart workflows via Java `HttpSession` with dynamic item addition, quantity adjustments, and subtotal calculations.
- Integrated database persistence using **JDBC** and `PreparedStatement` interfaces to execute queries against a relational **MySQL** database.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering — Graduation: 2025

Vellore Institute of Technology, Andhra Pradesh (VIT-AP) • Specialization: Artificial Intelligence & Machine Learning
